

Midrange IT solutions

North American Systems IT Optimization Solutions

Customized solutions designed to:

» minimize TCO

» maximize ROI

» stimulate innovation

Hardware

North American Systems offers a wide variety of hardware from a number of manufacturers, including:

- » IBM
- » Dell
- » Sun
- » HP
- » Cisco
- » HDS
- » SGI

We are a proud IBM Premier Business partner. North American Systems is also an authorized reseller of established vendors like SGI, HDS, and Dell.

We offer you a variety of options when you decide to purchase hardware:

- » new authorized product
- » new-in-box product
- » refurbished
- » bulk-packed

Stretch your IT budget by extending the life of your current investments in legacy or EOL hardware and software, without having to buy new systems, or undertake expensive migration projects.

We offer a full range of products from these vendors, including:

- » fully-configured systems
- » storage products
- » software solutions
- » memory kits
- » upgrades and spare parts

Solutions

Digital Asset Management

Maximize the value of your rich media assets. DAM systems allow you to digitize and integrate video, documents, animations, and images into your production workflow.

Disaster Recovery

Protect your data and mission-critical applications from everything, including site, system, application, or operating system failures.

Virtualization

Simplify management processes, and dynamically allocate computing and storage resources across heterogeneous IT infrastructures.

Business Continuance

Achieve continuous availability and access to critical enterprise information and business processes

Compliance

We offer a wide variety of hardware and software solutions to get you compliant with new regulations and mandates.

Business Intelligence

Data marts, data warehouses, and enterprise reporting are now available for the iSeries with this BI package.

Content Management

Centralize unstructured digital content and assets, and make them accessible, searchable, and browsable.

Document Imaging & Management

Robust, inexpensive, and powerful document imaging & management solutions for IBM midrange systems.

Professional Services

- » free software consultation
- » leasing
- » rentals
