

ORACLE®

Database & Enterprise Application Architecture

Oracle 10g

Oracle is the market share leader in the relational database management solutions (RDBMS) market. Their newest database solution, Oracle Database 10g, delivers superior performance, security, & reliability in a package that integrates into any environment, and automates repetitive administrative tasks.

- » includes business intelligence capabilities
- » open framework provides programmatic access, centralized management, and multi-channel delivery of internet services
- » provides recovery from disaster situations
- » integrated manageability creates a complete business view of all components powering e-Business processing
- » multiple layers of security

RAC

Oracle Real Application Clusters (RAC) enable the transparent clustering of packaged and custom applications, providing automated failover and the ability to add capacity without disrupting operations.

Applications

Middleware

Oracle Fusion Middleware is an extensive portfolio of software products that enable organizations to run, secure and expand their business operations. Components include:

Professional Services

As an authorized Oracle partner, we are qualified to offer all products from Oracle's complete portfolio of software & middleware solutions.

In addition to competitive pricing on all of Oracle's products, we can help you evaluate your current licensing scheme and help tailor it to accommodate your unique business requirements. Our experienced account executives can help you optimize your current Oracle investments, and prepare a plan to add capacity in a cost-effective manner.

We can help you fully integrate complete Oracle technology solutions, assisting with pre-install tasks such as benchmarking, configuring a solution that maximizes efficiencies to ensure ROI, and test and stage the system prior to shipment. North American Systems also provides professional installation, training and integration services.

Contact us today to get a competitive quote, and compare our pricing to what you are getting now for your Oracle licenses, contracts and services.
