

SOPHOS

Sophos Security Products

Protect your IT while surfing the web,
using email, or accessing the network

✉ email security and data protection

- » Anti-spam email protection
- » Anti-virus email protection
- » Spyware email protection
- » Malware email protection
- » Phishing email protection
- » Threat profiling
- » Reputation filtering

EMAIL SECURITY APPLIANCE

- » Designed to reduce the time and effort spent on managing email gateways
- » Hardened appliance solution is remotely monitored by Sophos for proactive maintenance and updating threat definitions for the most up-to-date protection
- » If appliance fails to connect, it alerts administrators immediately via visual, email, or direct notification

EMAIL ENCRYPTION APPLIANCE

- » Standalone email encryption
- » Utilizes same encryption technology featured in Sophos SafeGuard encryption software
- » Integrates seamlessly with other Sophos email security products and any SMTP email infrastructure

PUREMESSAGE SOFTWARE

- » Software designed for UNIX, Microsoft Exchange or Lotus Domino
- » Enables security administrators to setup specific security policies and content rules whether the email is inbound, outbound, or internal
- » Setup policies based on keywords, sensitive information, and true file types and apply unique rules.

SOPHOS

 web security and control

-  **URL filtering** augmented with unique reputation and risk classification data extends policy options and bolsters protection for sites in allowed categories.
-  **Sophos real-time Behavioral Genotype® Protection** detects zero-day threats including variants, families and large categories of malware.
-  **Content filtering** includes a rich set of policy options for controlling file-types, potentially unwanted applications (PUAs), malware attempts to call home, and the posting of sensitive data to internet sites such as webmail, forums, or blogs.

- » Blocks emerging web threats at the gateway level with malware, spyware, viruses, phishing, and hijacked trusted websites
- » Anonymizing proxies can be blocked to prevent users from bypassing filter controls
- » Encrypted TFTP and HTTPs can be scanned and filtered, and internet use policies can be enforced, filtering against a total of 54 specific categories of content
- » Policies can be time-based, enabling management to loosen browsing restrictions during lunch and after work
- » Manage and report for up to 15,000 users from a single interface

 **sophos nac**
ADVANCED

- » Check computers accessing the network and provide or block access
- » Ensure that all computers, have up-to-date operating system patches, are running the right up-to-date anti-virus solution, and have their firewall enabled prior to being granted access to the network
- » Monitor multiple sites and access points centrally
- » Perform policy checks prior to access being granted, as well as periodically during the network session
- » Enable granular control so specific policies can be setup for various users and groups, providing them with access only to information, servers, and applications they need

A VALUED PARTNER

As a Sophos partner, North American Systems is qualified to provide the full range of their security products. Our extensive experience in the IT industry lead us to partner with Sophos because:

- » the 24x7 technical support that comes standard with their products puts you in contact with an actual Sophos employee at the first point of contact
- » simplified licensing bundles a number of features into a single product, eliminating the need to purchase point products to address various security holes
- » their product enables seamless management of security across multiple platforms and operating systems from a single interface

Contact us to find out more; we can help you size and price out a security solution that fits your needs, and help you can migrate to this new product with minimal disruption.
